AUTOROBOT MECHANICAL MEASURING SYSTEM

Speed up straightening with Autorobot's Mechanical 3D Measuring System, which offers multiple reference points for both chassis and upper body. This measuring system is ideal for the professional body shop with a reputation for high quality and skilful repairs...

Autorobot is a front-runner in 3D body measuring. Today we are able to offer 3D measuring-point references for the entire length of the vehicle. This kind of comprehensive information makes the Autorobot-equipped body stand out from its competitors...

With the measuring rod set to the data sheets length, height and width specifications, the red measuring cup shows the direction to pull. Repairs are quick and accurate; you can be certain of the quality of your work...
